SUMMARY

Passionate web developer skilled in both front-end and back-end technologies, with hands-on experience building dynamic, user-friendly applications. Proficient in **JavaScript**, **React**, **Angular**, and **Node**.js, with a keen interest in delivering clean, scalable, and responsive web solutions. Eager to leverage my skills in building impactful, end-to-end web applications for clients.

Technical Skills

Frontend Development

- **Frameworks & Libraries**: React, Angular, Redux Toolkit, TypeScript, jQuery
- **UI/UX Tools**: Tailwind CSS, Bootstrap

Backend Development

- **Frameworks & Tools**: Node.js, Django, Spring Boot, Express.js
- **Databases**: MongoDB, MySQL

Programming Languages

- Python, Java, JavaScript

DevOps & Tools

- **Version Control**: Git
- **Testing & APIs**: Postman

EXPERIENCE

Software Developer – Triangle Simulation Pvt Ltd
Dec 2023 – May 2025

- Coordinated a team of 3 developers to design and implement a dynamic web application for Computer-Based Training (CBT).
- Developed UI templates and implemented advanced web functionalities using React, and JavaScript.
- Led client meetings to understand requirements and deliver tailored web solutions.
- Authored key project documents, including scope of work and meeting minutes.

PROJECTS

The Book House (Library Management Website) - Ongoing
Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS
- Developed a full-stack web application to manage library operations efficiently
- Implemented secure authentication and role-based access control (User/Admin)
- Enabled features like book borrowing, return tracking, Wishlist, and user history
- Designed an intuitive admin dashboard with statistics: total books, borrowed books, user count, and fines
- Incorporated real-time fine calculation and status tracking (pending, paid)
- Created RESTful APIs for managing books, users, and history records
- Ensured user experience with dynamic UI, toast notifications, and responsive design

ShopEase – E-commerce Platform
Tech Stack: React.js, Node.js, Express.js, MongoDB
- Built a full-stack e-commerce web application with a seamless shopping experience
- Implemented secure user authentication (Sign up & Login) with session/token management
- Developed product filtering, customer reviews, cart management, and order tracking
- Integrated payments using Razorpay and Stripe (Test Mode), with support for Cash-on-Delivery
- Designed an admin dashboard for managing products, users, and orders
- Followed MVC architecture and RESTful API standards for scalable backend development
- Deployed application for testing and demo purposes
- [View Project](#)

Todo-App
Stack: React, JavaScript, HTML, CSS
- A simple task management app with features like task creation, completion toggling, and responsive design using Bootstrap.
- [View Project](#)

CERTIFICATIONS
Masters in Full Stack Development - IT Vedant (Completed: 2023

EDUCATION
Bachelor of Technology – DBSKKV, Dapoli
Masters in Full Stack web Development – IT Vedant Institute
